Buster reserves the right to change its product range - i.e., the models, colours, accessories and prices of its boats - without notification. The standard equipment of the boats may vary by market area. The photos in this brochure and other publications show some accessories that are not included in the standard equipment. The performance tables are indicative. Please confirm the content of the boat delivery with your Buster dealer.

# Welcome to the season 2014 Buster brochure!

Carefree Choice has been our slogan for a long time, and over the past year I have give a lot of thought to what it really means. For myself as an active boater, it stands for reliability, safety, predictable handling even in tough conditions, good ergonomy, overall fuel economy and last but not least - good resale value. The list could be extended on and on, but the repeating vote of confidence that is given to us by Nordic buyers, making us the market leader in Finland, Sweden and Norway, shows that we have hit the sweet spot with our constantly evolving boat range. Thus, I would like to take the opportunity to thank all Buster buyers for the trust You have shown by choosing Buster - Your Carefree Choice.

For the ongoing season we have launched a competely renewed Buster X, the allround champion. The new model has only two things in common with it's predecessor: the name and the versatile basic concept. The new Buster X has more interior room, returns better fuel economy, has even better handling characteristics while being sturdier and more stylish than the previous model. In addition to the X, we also launched a brand new L Pro to succeed the Lx pro. The new L Pro is particularly spacious inside, and has improved handling to boat.

In addition we have harnessed our 5 decades of experience in building aluminium boats to the growing segment of GRP decked aluminium hulled boats. By launching the new Buster E-series with it's first model, Buster XLe, we are introducing a new range of multifunctional and stylish pleasure craft. We will continue to develop the E-series range in parallell with the traditional, full aluminium Buster range.

This past season was also a first for Buster Plus services, and hundreds of boaters have enjoyed a carefree season thanks to Buster Insurance and Buster Moorings. Buster Guard in turn has helped Buster Plus customers sleep well at night while away from their boat.

We have also increased our reach in social media, and thousands of You have found us on Facebook (BusterbyFiskars) - a brilliant media to publish news, stories and events as they happen during the boating season. I hope that even more of You will find us online, and I also trust that You will find a suitable boat for Your particular needs among our wide range of boats available for the 2014 season.

Boating Regards,

**Anders Kurtén**  
Director, Products,  
Fiskars Boats

## Superior aluminium boat

Buster is the largest and industry leading Northern European designer and manufacturer of aluminium powerboats. Of over 100.000 boats that we have launched over the past 5 decades, a majority is still in use.

Our design has always been guided by uncompromising goals regarding ruggedness, everyday practicality and seaworthiness. These values, combined with generations of industrial, hand crafted traditions has created a quality level that is already carries a legacy of it's own: Buster.

AHT – Aluminium Hull Technology by Buster is living proof of the experience and relentless work spanning 50 years that we have committed to in order to make our boats ever better.

## Above all: less to worry about

### Superior marine aluminium

Marine aluminium is light but stiff, it tolerates impact, scratches and abrasion without structural deformation. It does not burn, crack, rust, nor does it suffer from moisture penetration. Marine aluminium tolerates extreme temperatures and weather well, so the boating season can be extended from early spring until late autumn.

### Exceptionally sturdy construction

The innovative hull solutions, first class materials and continuous on-water testing guarantee safe handling, good performance and product longevity.

Our solutions for stiffening the hull make the boat durable and guarantee stable driving characteristics, while keeping the boat light. Our over dimensioned transoms enable large engines, and our carefully designed underwater bodies give consistent and pleasant handling even in adverse weather conditions.

Extensive soundproofing guarantee best in class comfort regarding noise levels.

### Everpresent ecological values

Being at the forefront is not only about technology and performance. It also involves responsibility for the environment. We aim to minimize the negative impact of our production and in our material choices.

80% of the raw material in our boats is recycled. The components of a finished boat can be recycled to 90%, because aluminium and plastic parts can be recycled and wooden/plywood parts can be burned. The ecological aluminium used for hull and stringers can be recycled indefinitely.

We transport all appropriate scrap material to a recycling plant.

The exceptional durability and longevity of a Buster is beneficial to owner and environment alike. In our structural design we focus on optimally shaped underwater bodies and a low total displacement. This leads to two benefits; good overall fuel economy with a smaller engine, and also lower fuel consumption while trailing the boat behind a car.

### Carefree and versatile

A Buster does not need annual waxing, painting or surface treatment. Fresh water cleaning suffices. With a Buster you can run the boat ashore even on a cliff or pebbles. You can load the boat with luggage or even construction materials without having to be worried about dirt or dents and dings.

Buster is a true multi-purpose boat. Due to different interior layouts and factory installed equipment options it is well suited for daytrips, cruising, fishing, water sports and other hobbies. A Buster also serves as a workhorse for light professional use and heavy commuting.

## Buster Cabin

### Commuting boat with overnighting option

The Cabin gets you there comfortably  
all year round in all weathers.

1. The spaciousness and airiness of the cabin, which is high enough to stand in, is increased by the tinted glass roof, the large opening glass window and the sliding rear door. The standard seats fold down to create two berths. The sliding rear door makes it easy to walk through the cabin. The cabin is silent.
2. The large aft deck can be covered with a canvas that has standing room. This makes year round boating even more comfortable.

3. The ergonomic steering console ensures driving comfort even over long distances. The NAVI package features a flush mounted chart plotter of up to 12" in size, and the boat can be equipped with a radar. Driving is facilitated by hydraulic steering. A factory-installed outside steering position with all essential control devices is available.

## Buster Cabin

### Performance

The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed – especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanliness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster Cabin	
Seating capacity	8
Capacity weight	600 kg
Length overall	6,92 m
Width	2,43 m
Draught	0,35 m
V bottom angle	21°
Weight (without engine)	1185 kg
Engine power range	115–200 hp
Engine rig length	XL
Fuel tank, volume	200 l
Design category	C
Maximum speed	40 knots

The Buster Cabin is the right choice for you, if the boat fullfills more functions than just transportation and utility. The boat is designed for those who journey far and during adverse conditions, spending longer times onboard than the typical cottage commute. The spacious interior carries up to eight, and temporary overnight accomodations are available for two.

The standing room interior is designed to be pleasant and airy. The glass roof and panorama views give excellent visibility in all directions. Noise insulation has also been further improved, as the Cabin is the least noisy boat in the range. With fall fishing expeditions in mind, the on deck lighting is planned with reduced light conditions in mind. When night falls, the driver's and co-driver's seats fold down to combine with the aft seats, creating two comfortable, full length berths.

The Buster Cabin is an all weather commuter that is comfortable even in rough weather. The seagoing hull with it's deep V section and thick, 5 mm bottom plate has been proven by various authorities in Northern Europe. Due to the optimized aluminium hull, the Cabin is a stable, all weather companion. With it's wide power range it's easy to find a combination that gets you to your destination safely, comfortably and on time.

Standard equipment		Optional equipment	Accessory packages
Hydraulic steering	Swim ladder, aft deck, swim/work platform	Targa	NAVI 7 package

## Buster SuperMagnum

### Superior detailing

Buster SuperMagnum – need for prestigious speed.

1. The stylish and harmonious, red night-lights facilitate operating in dark and dusk lighting conditions.
2. Tilt helm, electronic RCD and power steering make handling the boat light and exact. Due to the multiple adjustment options, every driver can find an optimal position. The joystick controlled trim tabs are standard and allow You consequent control over planing position.
3. The aluminium transom can take a 225–300 hp performance engine. The swim platforms make moving around easy, and swim ladders and handles give additional safety. The fuel cap is beneath a lockable lid.\*

4. The steering console has plenty of room for additional instrumentation and equipment. The iPod, iPhone, iPad, and Mp3 compatible audio system provides for entertainment on board.
5. The airy and spacious canvas gives protection in all weathers. The two part canvas adapts to different conditions and can be stored in the roomy canvas garage.

\* The optional locking set is available for this model. The set contains Abloy Sentry locks, one-key adapted keys and a locking wire.

Buster SuperMagnum

The SuperMagnum is the undisputed flagship of the range. It is the choice for the discerning boater who enjoys speed and always aims for the best, down to the minute detail. Performance is guaranteed by 300 horsepower, and having the most luxurious and comfortable passenger seating available creates a unique Buster-experience that can not be matched!

In addition to speed potential, the SuperMagnum is right at home in rough weather. Even at top speeds over 50 knots our crown jewel demonstrates predictable handling even when heavily loaded. The ergonomic, adjustable driver's and co-driver's offshore seats provide good directional stability sideways. The leather clad tilt steering wheel and high end audio system add a dash of luxury to this powerful Buster.

The Buster SuperMagnum is built for speed. Deck hardware made of stainless steel is a given. Buster Guard readiness gives you optional additional security when you are away from the boat. No wonder that we way exceeded our sales targets making the SuperMagnum a category killer in the Nordic countries. Maybe it's your turn this season?

Performance

## Buster Magnum

When we launched the first generation Magnum in 1994, many felt that the boat was unnecessarily large and powerful, and still in 2014 a Buster Magnum is an imposing presence on the water. As the most sold boat in its category it is an integral part of the landscape at sea and on the lake. The formidable and comfortable Magnum is one of the most desirable powerboats on the market. It guarantees comfortable passagemaking for up to eight passengers, while being the powerhouse in the range with speed potential close to 50 knots. The Buster Magnum is the active boaters dream, and the wide power range facilitates finding a suitable combination for your needs.

Despite its hefty proportions the Magnum is an easy boat to handle even in demanding conditions. The canvas top that is housed in a fixed garage offers protection for up to six passengers. Ample stowage facilitates various on-and-off water hobbies and boosts comfort. The non reflective console top also aids visibility at night.

The Buster Magnum effortlessly adapts to many kinds of boating needs. It is equally suited for summer cruises and fishing alike. Wide bathing platforms, sturdy swim ladders and the optional water sports bracket are but a few reasons why almost 4.000 boat owners have chosen Buster Magnum since its launch in 1994.

## Buster XXL

### Spacious and stylish

The Buster XXL is a spacious boat for the active, sporting boater.

Buster **XXL**

1. The Buster XXL is streamlined in terms of both shape and handling.

2. The two part canvas adapts to different conditions and offers pretection for up to six persons. The canvas garage can also be used to store long objects.

3. The anti-skid patterned aluminium surfaces of the steps retain their grip even in wet weather. Moving around is facilitated by the sturdy railings.
4. A versatile waterskiing bracket that also serves as an extra railing is available as an optional equipment. The wide, roughened swim platforms make it easy to get into the water and climb back on board.

5. The cabin provides ample space for spending time together and moving around. The forward-sliding aft sofa can be extended with the optional sunpad and mattress. The aft sofa also serves as a storage compartment.

## Buster XL

**The compact but grand Buster  
– dream boat #1 in Finland**

The Buster XL – frugal and spacious.

1. Getting on board is easy and safe thanks to the anti-skid patterned bow deck and step and the railings. The cleats and fixing eyelet ensure safe fastening upon mooring.

2. The tall windscreen and two-piece door provide protection against wind and splashes. There is a fixed two-piece door between the consoles.
3. The stern features a wide swimming platform and a swim ladder, as well as large, level cases for the anchor and ropes. The fuel filler cap is protected by the lockable\* rope case cover. The convertible top can be conveniently folded into the spacious cover case.

4. The convertible top is included in the CANVAS package.

\*The optional locking set is available for this model. The set contains Abloy Sentry locks, one-key adapted keys and a locking wire.

Engine power range	70–115 hp
Engine rig length	L
Fuel tank, volume	100 l
Design category	C
Maximum speed	39 knots

The Buster XL is the smallest of the large Busters. It combines big boat characteristics in a thrifty category. The XL is a stylish and sturdy all purpose boat, that is well suited for leisure and utility. Like all Busters, it represents a carefree choice, that provides a touch of luxury into your boating life.

The XL is the choice of the quality conscious boater who values practicality and overall economy. The wrap around glass windscreen with wipers contributes to comfort and safety. Ample stowage and rope lockers make boating a pleasure also for passengers. The audio system in the ENTERTAINMENT-package guarantees comfort during longer passages.

The Buster XL, deservedly, is one of our most popular models. The unsinkable and streamlined XL is an assertive choice for commuting as well as leisure. The comparatively large bathing platforms are built for fun! No wonder that readers of Kippari magazine chose the XL as the #1 all-round dream boat in Finland in 2012! The trust we have earned is a matter of honour for us.

## Buster XLe

### *E-SERIES*

#### **A roomy GRP decked aluminium hull boat**

The Buster XLe is a stylish and practical  
Buster E-series!

# Buster XLe

## E-SERIES

- 1. Buster XLe provides a lot of space on deck for passengers and their gear. The door between consoles is a standard equipment. Stylish grey, anti-skid floor is both easy to maintain and safe to walk on.
- 2. One can flush mount a 7" chartplotter or other instrumentation into the stylish console. The driver's view through the windshield is unobstructed.
- 3. The tempered glass windshield gives shelter from wind and spray. The walk-through door gives easy access to the cockpit.
- 4. The aft sofa is upholstered with thick, detachable cushions (standard equipment). All seats are easily removable. The spacious canvas garage makes everyday life a lot easier.
- 5. The canvas top is standard equipment. The canvas top shelters passengers from wind, spray and rain.

The XLe is the first boat in the new Buster E-series. The Buster XLe is based upon the acclaimed XL hull. 5 decades of experience building aluminium boats is combined in the aesthetic look and feel as well as the versatile and practical lay-out of the XLe. The robust wrap around windscreen and fixed door protect passengers from wind and spray, while the voluminous and user-friendly canvas garage makes life easier in grim weather.

The XLe is the choice of the quality conscious boater who values practicality and overall economy. The wrap around glass windscreen with wipers contributes to comfort and safety. The noise insulated construction, ample stowage and rope lockers make boating a pleasure also for passengers. Grey anti-skid floors are practical regardless of whether you use the boat for fishing or other marine activities.

The Buster XL, deservedly, is the Dream Boat #1 for finns according to Kippari magazine. The wide power range and best in class, fixed 138 litre fuel tank gives you an unparalleled array of options from economical to performance oriented. Stainless steel deck hardware and an impressive list of standard equipment brings "Carefree Choice" to an entirely new style class in our newly launched E-series.

Buster XLe	
Seating capacity	7
Capacity weight	525 kg

## Buster X

### Modern, multi-purpose Buster

A Buster that adapts to your needs.

1. The convertible top easily folds into a roomy canvas garage.

2. The boat is extremely spacious for it's size with generous seats, spacious deck arrangement and unobstructed passage. The two part door between the consoles is standard.

3. The seat/storage boxes can be removed when more open space is needed for transporting goods. The lockable stowage spaces have Abloy Sentry locks. The same key works for all locks on the boat, and You can also get more locks that work with the same key.
4. The door between the consoles protects passengers during driving and is standard.

5. The adjustable, turning boat seats bring travel comfort and make it easy to move about the boat.

Buster X

The Buster X is a versatile all-round boat, that adapts to your needs. The versatility is precisely why it is one of the most popular boats in the range. Registered for seven persons, Buster X is flexible precisely when you need it to be. All the seat/storage boxes including the aft sofa can easily be removed. With optional accessories you can customize this Buster to fit your needs.

The Buster X is an excellent choice for the fisherman. The open, spacious deck arrangement facilitates moving around in the boat. The roomy interior increases the comfort of the skippers friends, and make trolling easier. The seagoing hull is suitable for extended fishing trips. Sturdy railings and anti-skid treated footsteps make for safe boating even in rainy conditions. For the night, you can drive the boat straight up even on a rocky shore.

The Buster X has NFB steering for additional comfort. This makes driving lighter when your destination is further away. The large, 100 litre, fixed fuel tank is the largest in it's category. The Buster X is a straight A partner for the boatowner who appreciates activity during their time off work.

**Pleasure and family moments afloat**

The most popular powerboat in the Nordic countries adapts with your style and needs.

1. The spacious, anti-skid patterned aluminium bow deck makes it safe and easy to get on and off the boat.
2. The optional convertible top provides protection for passengers. The top can be folded into a canvas cover case.
3. The Lx is suitable for diverse recreational boating and water sports.
4. A fixed 53 litre fuel tank is provided as a standard equipment.
5. The door between the consoles is standard and provides protection against wind and puts the finishing touches on passenger comfort.

## Buster L

### A favourite for tough use

The most popular powerboat in the Nordic countries – with good reason.

1. The seat/storage boxes can be removed to provide more room at the front.

2. The aft section of the two-console boat can be protected by a practical optional cover that lets in a nice amount of light.

3. The wind protection of the consoles can be increased by adding a door between them (included in the CANVAS package).
4. The boat's easy manoeuvrability, wide interiors and high sides increase travel comfort. Easy to manoeuvre, the boat accelerates effortlessly and retains its safe handling characteristics in all situations.

**Buster Le**

***E-SERIES***

**The challenger in the most popular segment**

A brand new E-series boat based upon the Buster L!

1. Buster Le provides a lot of space on deck for passengers and their gear. The door between consoles is a standard equipment. Stylish grey, anti-skid floor is both easy to maintain and safe to walk on.
2. Detachable seat-stowage boxes are covered with cushions (standard equipment). The stowage is lockable with Abloy Sentry locks with single key system.
3. Both driver and co-pilot travel comfortably on ergonomic boat seats. The flip in the seat gives one more choice of seating and comfort while it makes it possible to use the seat in the offshore position.
4. There is mooring rope lockers in the aft of the boat. The hatch with the anti-skid aluminium plate on top of it, works as a safe walk on platform to the boat. Fuel tank filler cap is located under the hatch of the right rope locker.
5. The canvas top is standard equipment. The canvas top shelters passengers from wind, spray and rain.

Buster Le	
Seating capacity	6
Capacity weight	480 kg
Length overall	5,1 m
Width	2,05 m
Draught	0,3 m
V bottom angle	16°
Weight (without engine)	450 kg
Engine power range	50-70 hp
Engine rig length	L
Fuel tank, volume	56 l
Design category	C
Maximum speed	32 knots

Standard equipment			Optional equipment	Accessory packages
NFB-cable steering	Door	Battery compartment	Seat-stowage box 45 l	NAVI 7 package
Stainless steel railings and cleats	Lockable stowages, Abloy Sentry locks	Main switch with automatic fuses	Cushion for seat stowage box	
Grey antiskid floor	Boat seats, seat cover hood	Lights mast	Watersports bracket	
Aft canvas	Cushions	Fire extinguisher		
Canvas garage	Rope lockers	Bilge pump		
Steering console	Rope compartment in the bow	Rainwater drainage from cockpit		
Left console	Swim ladder and platform			
Clove box	Built-in fuel tank 53 l			

The Le continues the development of the Buster E-series. The Le is based upon the tried and tested Buster L hull that has earned it's spurs on thousands and thousands of Buster L boats over the past decade. The Le introduces the look & feel made possible by a GRP deck – a stylish and aesthetic boat without compromising versatility and an open deck plan. The sturdy windscreen and fixed door between the consoles protect passengers from wind and spray, while the exceptionally easy to use canvas garage simplify the boating experience in inclement weather.

The removeable seat/storage boxes on the Buster Le enable the boat to be used as a commuter, fishing boat as well as for transportation. Overall economy and stylish design are already a given with all E-series Busters. The wrap around windscreen protects driver and co-pilot ever better. The silent construction, ample stowage and integrated rope lockers make boat travel comfortable and pleasant for passengers as well. The grey anti-skid floor adds practicality both for fishing and commuting.

The Buster L has been the most popular powerboat in the Nordic countries during the entire new millenium. The stable handling, versatility and freedom given by the large, fixed fuel tank gives you an array of stylish multi-purpose boats. Stainless steel deck hardware and unparalled standard equipment levels bring our promise: "Carefree Choice" to a new level in this most recent addition to the E-series.

## Buster M

**A versatile boat for the family**

M as in multi-functional.

1. The ample interiors, the railings running around the sides and the anti-skid treated stepping surfaces of the bow deck and of the side step increase boating safety.
2. Quickly rising to a plane, steady and stable running and a secure steering feel make driving the boat enjoyable and safe.
3. A door between the consoles is available, providing protection against wind. The easy-to-use door has a fixed bottom section on hinges as well as a roll-up top section.

\*The optional locking set is available for this model. The set contains Abloy Sentry locks, one-key adapted keys and a locking wire.

4. The protection of the two-console version can be increased with an optional cover. When lowered, the cover folds neatly on top of the motor well.
5. Lockable\* front seat/rod box that provides storage space for fishing equipment and other long items, is standard equipment in one-console M boat and optional accessory in two-console M boat.

Side colour trim

• For comprehensive boat-specific information, please contact a Buster dealer or visit [www.busterboats.com](http://www.busterboats.com).

## Buster M

The Buster M is one of the most straightforward boats in the range. It is perfectly suited for daytrips at the summer cottage or a lazy afternoon of relaxed fishing. The lack of complication and overall economy of ownership make the Buster M a family favourite. The boat carries five persons.

For it's size, the Buster M has a high level of standard equipment. Generous options make it possible for you to customize the boat according to your taste and preference. The console has dedicated places for compass and instruments. The M is that smallest boat in the range that can be delivered with optional, factory installed chart plotter mounted. The fisherman will appreciate the seat/rod box in the bow and seat/storage box in front of the steering console.

The Buster M can be supplied as single – and twin console versions. With the optional door between the consoles you can make the passage even more comfortable. The canvas top has room for three passengers, and for water sports a bracket is available. The stable handling creates a comfortable ride even for passengers in the bow.

## Buster S, Scc

### Uncomplicated boats for the summer cottage

Buster S and Buster Scc for fishing and  
light transports.

1.

The ergonomic dimensioning of the console enables driving Scc standing up. The centre console is the driver's vantage point with room for the installation of additional equipment, such as a compass and a chart plotter. A 45 litre seat-stowage box is located in front of the centre console.
2.

The optional harbour cover/canvas top protects the boat against rain, debris and sunlight.
3.

The spaciousness and stability of the boat increase the freedom of fishing and travelling.
4.

The Scc steering console is located on the centreline.

# Buster S, Scc

S

Scc

## Performance

The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed – especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster S	
Seating capacity	4
Capacity weight	300 kg
Length overall	4,58 m
Width	1,88 m
Draught	0,19 m
V bottom angle	15°
Weight (without engine)	259 kg (S), 280 kg (Scc)
Engine power range	20–30 hp
Engine rig length	L
Design category	C
Maximum speed	25 knots

Standard equipment	Optional equipment	
Steering console, windshield and handrail (S)	Set of cushions	Cushion for seat-stowage box (Scc)
Railings and bow rail	Back seat cushion	Bow rail, left
Base for fuel tank	Backrest cushion, right	Mounting plate for echo sounder transducer, rail
Cable steering	Backrest cushion, left	
Center console, windshield and rail (Scc)	Cushion for bow seat	
Seat-stowage box, 45 l (Scc)	Cushion for mid-seat (S)	
Battery compartment	Canvas/harbour cover (S)	
Main switch	Compass	
Lights mast	Locking set: Abloy Sentry locks, one key system, locking cable	
Automatic bilge pump	Ratchet straps 3 pcs.	
Middle seat with sowage (S)	Harbour cover (Scc)	

The Buster S and it's centre console equipped sister, Buster Scc are the small workhorses of the range. They are extremely well suited for, among other things, lake fishing. Due to our unique hull design, they are easily driven by 20–30 hp engines. For laying and lifting nets, they can also be rowed. The sisters are designed for you who appreciates stability and security without frills.

The sisters are very stable and roomy considering their size. The Scc feels like a larger boat due to the deck arrangement. The S comes with the mid seat as standard. Additional comfort is provided by the optional upholstery. Both models have the tried and true plastic Buster console. The Scc can also be driven while standing which allows better visibility and flexibility when the going gets rough.

The Buster S and Scc are all weather boats. Both models can be piloted from beneath a canvas cover, and lockable storage allows you to leave your equipment aboard.

Boat weights listed with standard equipment, without optional accessories and engine • Weight of each person = 75 kg • Refer to page 73 for the content of the accessory packages.  
• For comprehensive boat-specific information, please contact a Buster dealer or visit [www.busterboats.com](http://www.busterboats.com).

### Practical boats for the entire family

The durable, safe and easy to maintain Buster Xs and Xsr are created for local adventures.

Buster XS, XSr

The Buster XS and it's side console sister, XSr are the boats of choice for local needs. Durability, stability, predictable handling and safe, unsinkable structure guarantee that boating is pleasant even if you are less experienced.

Due to their sturdy construction and years of product development, these boats display predictable handling in all weather conditions. Even the Sunday boater has an easy time with harbour and landing manoeuvres. The anti-skid treatment on the bow deck and handles fore and aft facilitate moving around on the boat – even for the young ones. Lockable stowage compartments keep your equipment safe. Upholstered, water repellent seats make passages pleasant. On the XS, handles on the inside add comfort and safety.

Buster XS and XSr are the uncomplicated and utilitarian boats in the range. They do not require registering in the Nordic Countries, and the aluminium hull only needs regular washing with fresh water. The boats are easy to handle on water and can be trailed behind a regular car on a trailer w/o brakes (local regulations and applicable laws to be followed).

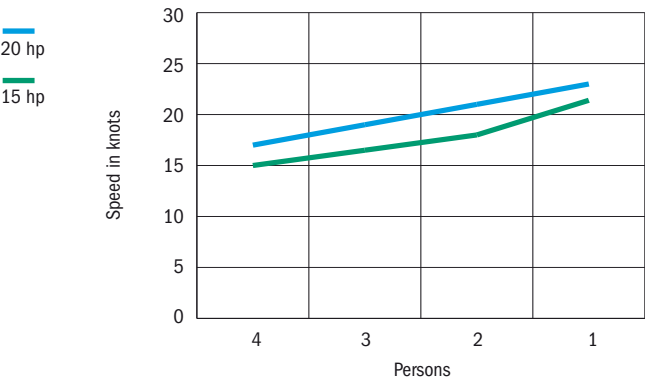

XS

XSr

Performance

The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed – especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster XS	
Seating capacity	4
Capacity weight	300 kg
Length overall	4,15 m
Width	1,65 m
Draught	0,18 m
V bottom angle	10°
Weight (without engine)	161 kg (XS), 166 kg (XSr)
Engine power range	6–20 hp
Engine rig length	XS: S or L, XSr: L
Design category	D
Maximum speed	24 knots

Standard equipment	Optional equipment	
Cable steering (XSr)	Steering console (incl. steering gear, steering cable), windshield and steering helm (XS)	Locking set: Abloy Sentry locks, one key system, locking cable
Steering console, windshield (XSr)	Aft railings	Ratchet straps 3 pcs.
Base for fuel tank	Side railings	Windshield
Manual bilge pump (XS)	Canvas top	
Automatic bilge pump (XSr)	Adapter for changing rig height (XS)

• For comprehensive boat-specific information, please contact a Buster dealer or visit [www.busterboats.com](http://www.busterboats.com).

- 1. The high, ergonomic seats are covered with foam cell cushion, which is easy to maintain.
- 2. The anti-skid treated stepping surface in the bow makes it easier to get on and off the boat.
- 3. The Buster XS is driven from the aft seat.

1

2

3

4

1. The Mini is brisk both with electric and gasoline powered engines. It can also be rowed.
2. The cell foam upholstery is easy to keep clean and comfortable to sit on.
3. The boat can be emptied of rainwater with the Easy Bail (pat. pend.) vent when running at planing speeds.
4. Accessory tip: your Buster dealer can provide you with a transom mountable bracket that allows you to use an outboard engine with short rig.
5. Durable and long-lived Mini is guaranteed Aluminium Hull Technology by Buster quality.

Standard equipment	Optional equipment
One pair of oarlock fastenings	Rowing set: one pair of oars, one pair of oarlocks

The Buster Mini is a full aluminium family boat, that can be rowed or driven by outboard engine. Depending on your choice, you can equip it with electrical or combustion engine or alternatively oars. As it only weighs 100 kg, it can easily be handled ashore. Winter haulout is a breeze as you can turn it upside down and leave it for the dark, cold season. Being unsinkable it is a safe choice for the less experienced.

The Buster Mini is an excellent choice for the summer cottage, for fishing, small transportations or as a tender to a bigger boat. Rain doesn't impede it, because the Easy Bail (pat.pend) bailer empties the boat both ashore and under way. Due to it's full aluminium construction, the Buster Mini does not require much in terms of maintenance. The occasional wash with freash water is enough. Compared to a GRP boat, the Buster Mini is truly a Carefree Choice!

Though the Buster Mini is the smallest boat in the range, it can carry three passengers with luggage in it's surprisingly spacious interior. Three upholstered seats guarantee comfortable trips even when going slow. The Buster Mini is the only boat in the range specifically designed with rowing in mind. It can be carried by two adults, and for longer trips it can be trailed behind a small car on a trailer w/o brakes (local regulations and applicable laws to be followed).

### Performance

The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed – especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Weight (without engine)	111 kg
Engine power range	2-8 hp
Engine rig length	L
Design category	D
Maximum speed	17 knots

## Buster Mini

**A Buster even for the young ones**  
Buster Mini – engine and oars alike.

## Buster Magnum Pro

*PRO SERIES*

### Supremacy in extreme conditions

The Magnum Pro for year round use.

1.

A storage compartment for large items opens from the front of the console under the two-person seat.
2.

The sturdy swim ladders facilitate working in the stern, getting into the water and climbing back on board. The platforms are anti-skid patterned aluminium. The aluminium stern structure features wide swimming and working platforms as well as a sturdy fold-up ladder. Under the platforms are cases for ropes and the anchor. The lockable\* cover of the case protects the fuel filler opening.
3.

The standard equipment of the Magnum Pro includes a Garmin 12" chart plotter and a compass. The tall, protective windscreen is made of durable tempered glass.
4.

The Magnum Pro is a tool for an extended boating season that does not shun harsh conditions. The appearance is streamlined even though the side height is almost 90 cm.

\*The optional locking set is available for this model. The set contains Abloy Sentry locks, one-key adapted keys and a locking wire.

Contact your nearest official Buster dealer for details.

Buster Magnum Pro

PRO SERIES

The Magnum Pro is the sturdiest boat in the range. The fact that it is over engineered, durable and sea-worthy make it the professional choice. It is suited for year around boating, but is naturally also a competent choice for demanding leisure boaters.

The Buster Magnum Pro offers durability and performance for professional and recreational use almost year-round. The excellent balance and performance oriented hull design of this straightforward and spacious centre-console boat ensure a controlled and steady driving experience even at high speed. Driving is facilitated by the optional electro-hydraulic power steering system. Thanks to the large fuel tank and fuel-efficient hull design, the boat's operating range is up to 240 nm.\*

The Magnum Pro is designed for professional use. The design premises were performance, practicality and safety. This model has it all: open corners aft facilitate fishing and moving around the boat. The targa arch leaves plenty of room for even large equipment. The 12" chartplotter comes standard. The hardened safety glass of the windscreen doesn't get scratched by the windshield wiper. This Buster is built for long trips.

\*In the example: engine 150 hp, fuel tank 250 l, reserve tank 10 %. Consumption calculated as 0,9 l per nautical mile.

## Buster XL Pro

### *PRO SERIES*

#### **Room to work**

The XL Pro is a sturdy boat for work and play.

- 1. The all-aluminium steering console can be placed either in the middle or on the right hand side. The distance between the console and the rear is optimized for stability and performance.
- 2. The aft canvas is a useful option.
- 3. The console can easily accommodate additional electronics. The targa includes predrilled holes for cables. The top of the console beneath the windscreen is treated with antiglare paint.

- 4. The sturdy, two-part, foldable aluminium aft bench has storage space beneath it. The wide swim platforms also house a foldable swim ladder and handhold. The fuel cap is housed beneath a lockable\* lid.
- 5. Fishing guide Kalle Paavola's XL Pro has numerous fishing oriented options and accessories.

\*The optional locking set is available for this model. The set contains Abloy Sentry locks, one-key adapted keys and a locking wire.

Contact your nearest official Buster dealer for details.

Buster XL Pro

PRO SERIES

The XL Pro is the choice of the active fisherman. Being sturdy and unsinkable it is also well suited for professional use in demanding conditions. With numerous options and accessories you can finetune your Buster XL Pro regardless of whether you are a fisherman or use the boat for other heavy duty purposes.

The XL Pro can be configured two ways: side- or center console. The large seat-stowage box in front of the console swallows your gear. With the optional configurations you can optimize the usage of space for your own needs. The XL Pro is designed especially with the needs of fishermen at heart. The double, stainless steel aft railings enable attaching various pieces of fishing gear. The generous dimensioning and rice grain pattern floor add to safety.

When working on the water open deck spaces are paramount. The available deck space on the XL Pro make moving around the boat easy while facilitating transporting goods onboard. The aluminium floors provide grip and traction while the open aft compartment with the two part folding aft bench allows unrivalled versatility; complete openness for fishing or comfortable seating for three passengers. As all large Busters, the XL Pro is stable both underway as well as in harbour. The hydraulic steering allows for light and accurate handling.

## Buster L Pro

### *PRO SERIES*

#### **Back to basics**

The Buster L Pro is a no nonsense choice for light professional use and hobbies.

1.

The bow of L Pro embody all the essential elements for a multifunction boat. Everything is durable and most practical even for the toughest hobbies. Wide and safe step is what one sees first. Aluminium floor is antiskid type, cockpit is plentiful and passage free. One can easily remove lockable seat-stowage box, which contains 45 liters space under seating.
2.

The center console is compact in its size and leaves generous passage in sides of it. The console shelters driver well from wind and splashes yet presents space to flush in chart plotter or other equipment. Driving position is good and relaxed and driver may also stand and drive if one likes it better.

# Buster L Pro

## PRO SERIES

The Buster L Pro is a no nonsense companion for demanding boating. The leading design parameter has been focusing on essentials. Open deck space, ruggedness and carrying capacity for up to six persons with gear. This boat can also be used for the cottage commute.

The Buster L Pro is designed for demanding circumstances. With several thousands of boats based upon Buster L hull platform, we have even further improved it's seagoing abilities. The centre console with windscreen shields you from wind and spray. The open deck plan with plenty of space on both sides of the console makes the boat an efficient transporter and an able fishing buddy. For longer fishing trips the boat can be equipped with a 5" flush mounted Garmin chartplotter.

The L Pro, like any Buster, is a carefree and virtually maintenance free choice for the demanding boater. Passenger safety has been paramount while designing this model as well. The boats topsides are high and the floor is rice grain pattern aluminium for grip and traction. This makes moving around the boat carefree and secure. Regardless of it's performance, it is still an easy boat to manoeuvre. Even fully loaded the boat will perform well, and if you choose the largest available engine option your archipelago equivalent to a pickup truck will change character and become a fun, balanced performance boat.

Side colour trim

Night Black Matt

The colours are represented as accurately as possible in terms of printing technology.

### Performance

The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed – especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster L Pro	
Seating capacity	6
Capacity weight	450 kg
Length overall	5,04 m
Width	1,98 m
Draught	0,29 m
V bottom angle	16°
Weight (without engine)	410 kg

"Where can I get  
a mooring?"

"The service book contributes  
to second hand value."

"Since Buster Guard monitors the  
boat, I don't need to worry."

# PLUS

## Ask your dealer about Buster Plus

Customize your own service package.  
The services you have chosen apply from the time of delivery of your boat/engine package,  
and monthly payments are easy to manage.

New Buster Plus services will be introduced during the coming seasons.

- **Buster Plus -starting package:** Buster Insurance, webservice and digital service book
- **Buster Guard** – less worries when you are not present
- **Buster Mooring** – for a carefree boat season

More carefree  
than ever  
with the Buster Plus  
starting package  
and the associated  
insurance!

## Buster Accessory packages

With Buster's factory-installed optional equipment packages, you can have your new Buster equipped with the desired accessory right away.

It is also more economical to order equipment in packages, as opposed to buying and installing each piece of kit separately. The components of the equipment packages are Buster guaranteed in terms of quality and usability, and when factory installed by professionals you get the optimal end result. When you order a new Buster, you can select the equipment packages to be installed at the factory. Factory installation guarantees the functionality, usability and safety of the boat and its equipment from day one.

To view accurate model-specific information about the boats and their optional equipment and accessories see pages 74–75. To build your own Buster, visit [www.busterboats.com](http://www.busterboats.com), then click on the English flag in the upper left corner of the user interface for the English language version of the "Build Your Buster" online configurator.

### NAVI

You can choose from three different Garmin chart plotters, integrated (either flush mounted or surface/bracket mounted) into the instrument panel and ready for operation.

The NAVI packages include chart plotter, compass, the necessary transducers and factory installation. With the NAVI PLUS package, you can add a fish finder feature to the 12" chart plotters.

### PERFORMANCE

Due to the equipment included in the PERFORMANCE package you can optimize your hull position depending on load, speed, fuel economy and weather. At the same time you get a splash of professionalism into your boating experience.

The vertically adjustable steering wheel of the PERFORMANCE package helps you ensure an ergonomically sound, comfortable driving position both while seated and when standing up. The trim tabs can be used to optimise the boat's manoeuvrability, performance, and trim.

### COMFORT

The COMFORT package includes model-specific seat and backrest cushions. For the largest boat models, the package also includes suspension seat posts for the driver's and navigator's seats.

The COMFORT package includes all upholstery and back rests for the boat.

### ENTERTAINMENT

The ENTERTAINMENT package is available for the largest Buster models. It includes a high-quality iPod, iPhone, iPad and Mp3 compatible audio system, speakers and an antenna.

### CANVAS

The CANVAS package includes a model-specific canvas, adjustable according to weather conditions for most Buster models. A protective cover or a separate canvas garage is provided for storage of the canvas top. For Buster M and L the package also includes a door between the consoles to provide protection against wind, spray and rain.
